PROFESSIONAL GLASS TINTING

# COMMERCIAL WINDOW FILM & ARCHITECTURAL FINISHES

THE BEST PROTECTION YOU'LL NEVER SEE. // SINCE 1988

[ [METROTINT.COM](http://METROTINT.COM) ]

# WHY METRO TINT?

**“Known as the window film experts by contractors, building owners and designers throughout the region.”**

Metro Tint sets the standard in the commercial window film business. Established in 1988, we have experience in building evaluations, energy analysis, window film installations and architectural finishes. Our team utilizes a proven and systematic approach to organizing and managing installations. Every job is given Executive Level service by our highly trained professionals.

We are trusted by Arizona and Northern Texas’ Landmark Properties.

We believe we are here to serve our clients to improve their quality of life. We focus on being a solution based company that puts the client’s needs first. Our goal is to maintain the highest level of professionalism with absolutely minimal disruption to building management and tenants.

## PROVEN TECHNOLOGY

Metro Tint is invested in the future with the types of films and products we carry. We use the most current technology for properly handling and installing your film. We utilize state of the art software to control logistics, design, and tracking; along with the latest precision cutting tables, laminators, clean rooms and large format printers to produce the highest quality output in the industry. All of this requires highly qualified people to execute your project, this is why we cultivate internal experts and never outsource. What this means for you is faster response times and quality installation from design to completion; and most importantly, customer service.

# DECORATIVE FILMS

## COST EFFECTIVE

Get the look of etched glass window panels for your home or office with decorative window film. Etched glass can be quite costly. Frosted window films give the appearance of expensive etched glass, they come in different patterns and textures, and are easily removed and replaced when a new look is desired.

## ENHANCED PRIVACY

Frosted window films are a privacy solution for glass walls and windows in homes, offices, and commercial environments. Decorative window film is a popular and cost-effective solution to create privacy on office partitions while letting light to still pass through.

Sometimes businesses need to increase the privacy between rooms or to the outdoors. Instead of putting up the same old window blinds, shades or curtains, decorative window films allow you to enjoy a bold new look! Enjoy more natural light, while still maintaining your privacy.

### Glass Finishes Include:

- Etched
- Cut
- Sandblasted
- Textured
- Printed Decorative Graphics
- Gradients

## FLEXIBLE DESIGN

For interior glass partitions, walls and window panels, window film offers a beautiful opportunity to create dynamic interior spaces that can be changed easily and inexpensively when tenants move, or re-designing your interior space. We offer VELA dynamic display-window technology by Avery Dennison, the newest in switchable window films. Don't forget safety: with distraction markers you can bring attention to the glass, and protect people from walking into the "invisible wall".

Our decorative window films allow for endless customization and branding opportunities.

# ARCHITECTURAL FINISHES

## BUILDING MODERNIZATION

We have developed a resurfacing system, utilizing flexible laminates, for modernizing and restoring a variety of smooth, hard, non-porous surfaces beyond just glass – both inside and out. This includes wall panels, columns, elevator panels, walls and metal/stainless steel. Whether your building modernization project is due to planned improvements, new ownership or preparation for lease or sale, our team provides a full and complete experience from consultation to certified professional installation. We offer a variety of high-end products to fit your price range. Our focus is to improve a structure's aesthetics, performance and value. We have the knowledge, technology and skill to handle even the most challenging installations.

**We transform older buildings into highly desirable modern properties:**

- **Extremely durable polyester and premium-grade multi-layered polymeric films are lightweight and flexible**
- **Over 700 architectural finishes from industrial concretes to elegantly aged woods and rich stone**
- **Metal Finishes include stainless steel, aluminum, brushed steel and chrome**
- **Applications include: doors, elevator cabs and wall panel systems, columns and many others**

# SAFETY & SECURITY

## PROTECT PEOPLE AND OTHER VALUABLES

When projects call for a professional security glazing installation company, trust Metro Tint to deliver proven solutions based on your threat level and budget. Our solutions include safety and security films from 3M, Safety Shield, DefenseLite security shields and BulletShield – the world’s most dynamic anti-ballistic retrofit glazing solution. The addition of Metro Tint’s products and anchoring systems dramatically improves security for all buildings and peace of mind for occupants. It is 24/7 passive protection you can rely on, the instant a threat occurs.

Since 1988, Metro Tint has been working hard to build a truly unique business to serve commercial, industrial, residential and retail customers. Whether your project is local, regional or national we can rapidly deploy installation teams to the largest buildings, school systems, behavioral health, government facilities or multiple retail locations.

We pride ourselves in our attention to detail and living up to the professional standards clients have come to expect.

### Protection Against:

#### Vandalism Threats

- Protect your brand
- Stop criminals outside
- No entry, no harm

#### Smash and Grab Threats

- Prevent forced entry
- Protect your inventory
- Don't be a victim

#### Ballistic Threats

- Protect your people
- Keep active shooters outside
- UL 752 rated

#### Unknown Threats

- Natural disasters
- Accidents
- Glass failure

# ANTI-GRAFFITI FILM

## Protects Against:

- Permanent damage
- Unsightly images or words
- Decline in value
- Costly downtime and disruption

## Common Applications:

- Schools
- Government buildings
- Office buildings
- Hospitals, Institutions
- Retail Storefronts
- Display cases
- Skylights
- Mirrors
- Elevators/escalators
- Gas station pumps
- Hotels

Do you have a zero tolerance for vandalism and graffiti? Protect your glass, mirror and metal surfaces against most scratches, acid etching gouges and tagging with Anti-Graffiti Film from Metro Tint.

- Easy to remove and replace quickly - without replacing your windows, mirrors, or metal panels.
- Money-saving option that's only a fraction of the cost of new glass.
- Rejects 99% of the UV rays that cause fading, helping to extend the life of display merchandise.
- Protects glass, mirror and metal surfaces from all forms of graffiti, including scratches and gouges.

Vandalism occurring during peak sales opportunities not only damages your image, but may deter limited-time customers from giving your store a chance. Glass replacement would be costly and more disruptive, while our film can be removed and replaced quickly, without the need to remove your windows, mirrors or metal panels. Protect your image with Anti-Graffiti Film so signs of vandalism can be removed quickly.

## MAINTAIN YOUR BRAND

When you see a building with graffiti or window damage, what do you immediately think? Protect what your customer sees each time they visit your property; whether it's the glass, the elevator/escalator panels, or the bathroom mirrors/panels, you deserve to be free from graffiti. Your store is your livelihood. Do not let future customers have a negative opinion about your business. Protect your windows with Anti-Graffiti Film so signs of vandalism can be removed quickly, which can help maintain your valued reputation.

# ENERGY EFFICIENCY

Since 1988 Metro Tint has installed energy efficient solar control tint across the country. According to the US Department of Energy, energy lost through conventional windows accounts for approximately 30 percent of heating and cooling energy. That translates to one of the most expensive costs in operating a building to maintain a comfortable environment. We can help update your building, balance temperatures, protect occupants, reduce glare, and eliminate ultraviolet rays resulting in reduced cost and increased comfort. Additionally, we utilize energy audit software to model your building to report a return on investment, energy use and reduction with window tint.

## INCREASE COMFORT AND PRODUCTION

It has been proven natural light helps people stay healthy and productive. We offer the most advanced films available to allow in natural light and keep the heat out. Ask us about 3M Thinsulate and 3M Light redirecting film, designed to maximize your daylight harvesting efforts.

## TRANSITIONAL FILM

Managed Sun Glare Control, Safe Daylighting and Increased comfort. Photochromic window films adapt to the intensity of sunlight on your window and door glass. Our film “transitions” from a lighter state to a darker, tinted state when exposed to direct sun. The patented photochromic molecular structure of CoolVu is the world’s first stable climate responsive window film. Now you can enjoy clear windows when wanted and tinted windows when needed.

### Benefits:

- **Most advanced transitional film technology**
- **Increased tenant comfort and reduced tenant complaints**
- **Tenant retention due to more usable space eliminates hot and cold spots**
- **Updates building appearance without changing the overall exterior appearance**
- **Return on investment**
- **Local utility rebates are often available**
- **Protects people from damaging UV rays**
- **Reduces fading of merchandise and furniture**
- **Logistics experts to minimize disruption to occupants**
