3M™ Thinsulate™ Window Film

Smarter windows.
More comfortable you.

Your home should be a comfortable, welcoming place. We'll help with the “comfortable” part.

Whatever your climate, 3M™ Thinsulate™ Window Film can help keep you and your family comfortable all year long. Our unique low-e window film helps retain warmth in the winter and cool air in the summer by increasing your windows' insulation value. A single-pane performs close to a double-pane, a double-pane performs close to a triple-pane.

Virtually invisible, the look of your window barely changes, inside or out. Yet it still helps protect furniture, floors, upholstery and artwork from UV rays that cause fading.

Easier and more affordable than replacing your windows, 3M™ Thinsulate™ Window Film is an efficient, cost-effective way to meet your window insulation needs.

Thinsulate™ Insulation for your windows.

A photograph of a man with dark hair and a white shirt holding a baby with dark hair. They are positioned in front of a window, looking out. The man's face is partially visible, looking down at the baby. The baby is wearing a blue patterned shirt and has their hand near the window. The background is a bright, out-of-focus window. A teal semi-transparent banner is overlaid at the bottom of the image, containing text and a graphic.

20x

**A single pane window loses
20 times as much heat as
the same area in an adjacent
well-insulated wall.**

CORNELL COOPERATIVE EXTENSION, CORNELL UNIVERSITY

How it works.

Warm in the winter
Thinsulate™ invisible insulation technology helps retain the heat keeping you warmer in the winter.

Cool in the summer
Thinsulate™ invisible insulation solar reflecting technology helps block the sun's heat keeping you cooler in the summer.

30%

of all energy used to heat and cool homes goes out the window.

U.S. DEPARTMENT OF ENERGY

Governor's residence.

This stately 1912 Tudor mansion had 3M™ Thinsulate™ Climate Control Window Film 75 applied to 1,100 square feet of glass, including intricate starburst-patterned and French-paned windows. This resulted in increased comfort (especially during cold Minnesota winters) and increased energy efficiency. Our unique low-e window film helps increase the window's insulation value; single-pane performs close to a double pane and double pane close to a triple pane. It also helps provide improved UV protection for antiques and artifacts.

The smart insulation needs the right installation.

We've hand-picked dealers we feel are best-qualified to be exclusive installers of 3M™ Thinsulate™ Climate Control Window Film. 3M puts our dealers through a training and certification program to ensure our customers are served at the highest standards.
